

Lower Waikato priority restoration

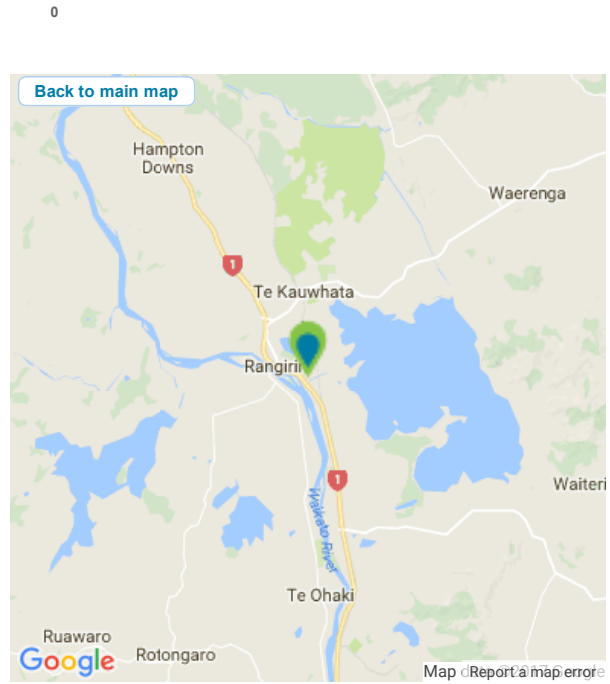

Lower Waikato River Enhancement Society Incorporated (Waikato RiverCare) - Kevin Hutchinson
 07 849 1666
khutchinson@waikatorivercare.co.nz

This project is to complete two new priority restoration projects on the main stem of the Waikato River and surrounding inflowing catchments, including the Mangawara Stream, Te Onetea Stream, Opuatia Stream, and in/outflows of the lower Waikato lakes.

This undertaking carries on the work by Waikato RiverCare and supporting partners over the last 16 years. Waikato RiverCare's successful Waikato River Authority funding application in 2011 provided for the development of not only the 'road map' for restoration of the lower Waikato River over the next ten years (44 identified priority riparian restoration sites on the lower Waikato River) but also 'the toolbox' with the development and publication of the riparian restoration guide on how to complete a successful riparian planting project on the lower Waikato River.

This is a Waikato River Authority funded project (WRA 14-013)
